

NCR FastLane SelfServ™ Checkout R6N

Maximize floor space while creating a fast and easy checkout experience with our compact, card-only self-checkout.

Your customers expect the shopping experience to be fast and easy, and self-service helps you deliver just that. NCR's FastLane SelfServ Checkout R6N is our sixth-generation solution built on more than 20 years of global self-checkout excellence. The R6N

features a compact footprint that supports both credit and debit combined with bi-optic imaging technology. This enhances security and customer convenience while its intuitive user interface makes it easy to use.

Save valuable space and IT dollars

The NCR FastLane SelfServ Checkout R6N not only helps you conserve space at the checkout, but it also saves money on your IT hardware investment because it supports only debit and credit payments. The R6N offers optional bagging, or packing areas, with weight-based security that can accommodate one to three bags to best fit the needs of your stores.

Complete shopper-friendly solution

The R6N is compatible with the intuitive NCR FastLane application software to deliver a complete self-checkout solution. It also supports an optional bi-optic imaging scanner, the NCR RealScan™ 79e, which powers NCR's optional Picklist Assist software. This shopper-friendly software uses item recognition technology to suggest a short list of potential items to speed up item selection and help improve accuracy, so it's faster and easier to purchase produce.

Protect against shrink

The NCR FastLane SelfServ Checkout R6N includes theft deterrents such as an integrated security scale, a sophisticated self-learning and adjusting weight database, intervention lights and sounds and attendant-monitoring tools. It also supports NCR's optional Produce Assurance software that helps prevent errors and fraud caused by substituting a lower priced item for a more expensive one, such as meat or alcohol. It alerts an attendant if there is a discrepancy, helping reduce shrink in your stores

Transforming your checkout

Your stores are the heart of your business, and finding new ways to improve the in-store experience is critical to staying relevant and profitable. As the global leader in self-checkout, we are committed to partnering with you to improve store operations, help with loss prevention and give your shoppers an easier way to scan, bag and pay, while maximizing your bottom line.

Why NCR?

NCR is a leading technology company that brings unexpected value to every interaction between consumers and businesses. We're the **#1 global retail POS software provider** and **#1 global self-checkout provider**, we provide software, hardware and services that run the entire store.

Digital first but not digital only, we help retailers differentiate and compete by connecting every touchpoint into the frictionless, "always on" experience consumers want today, while enabling tomorrow's innovations. From mobile to brick-and-mortar, from back office to loyalty and beyond, we help retailers bridge their digital and physical operations, transforming transactions into meaningful interactions—no matter where they happen.

NCR continually improves products as new technologies and components become available. NCR, therefore, reserves the right to change specifications without prior notice.

All features, functions and operations described herein may not be marketed by NCR in all parts of the world. Consult your NCR representative or NCR office for the latest information.
