OKI

High performance, versatile, 9-pin printers for dedicated forms printing

High speed, high volume, outstanding reliability

The ML5520eco and wide carriage ML5521eco printers are suited to high speed, high volume data and word processing applications where fast throughput and flexible paper management are required.

These 9-pin, impact printers are engineered to be tough enough for dedicated printing in the most demanding environments. With outstanding reliability, ease-of-use and barcoding facilities and the ability to run twice as long as most printers in their class, they are ideal for supporting forms printing at customer service points in wholesale and service environments.

Precision, Flexibility and Resilience

The ML5520eco/ML5521eco can accommodate multipart forms and stock that are up to twice as thick as those that fit our nearest competitor. Their relentless performance comes from OKI's unique, high durability printhead design; and a light, strong, efficient motor. The long-last rack-and-pinion drive system and a protective, impact-resistance chassis, make it resilient to even the toughest environments.

A patented optical sensor places the printhead for precise output, and the auto-tear feature accurately positions your continuous forms for a clean tear right at the perforation – eliminating wasted forms and facilitating your day-to-day forms printing.

Eco-friendly and cost effective

The ML5520eco/ML5521eco have been developed to be eco-friendly. With power consumption at just 1.5W in sleep mode, your running costs and energy consumption are kept to a minimum, as well as reducing your carbon footprint.

OKI's commitment to customers

The OKI brand is one of proven reliability and value. We provide printers that increase our customers' long-term business performance without impacting their budget.
