

K3

POS PRINTER

- Receipt/invoice, orders, labels printer
- 400MHz powerful processor
- RS232+USB+Ethernet
- Embedded Web Server (ETH)
- Powerful and fast: 280mm/sec
- Prints high quality logo and coupon graphics
- 200dpi printing resolution (optional 300dpi)
- 80mm paper width, 58-60mm adjustable (1 movable side)
- Paper thickness from 55g to 90g
- Paper roll external diameter max 100mm
- Auto-cutter 2.000.000 cuts
- Print head MTBF : 200Km
- 1D and 2D barcode printing (QRCODE, DATAMATRIX, PDF417, AZTEC)
- True Type fonts supported
- Paper-in, near paper end, anti-jamming sensors
- Mass Storage

- Automatic cover opening when the roll ends
- Fan-fold paper capability
- Easy access to the parts which need ordinary maintenance
- Cables retention system
- Touch keys: feed, cover opening; ON/OFF button
- Warning of technical assistance request through LED
- Drawer connector
- Buzzer
- Vertical mounting

Optional integrated WIFI module

Vertical mounting

Automatic cover opening when the roll ends

Custom's new **K3** model, which features the latest technologies for Retail and POS printers, is ideal for printing receipts, coupons, recipes, invoices and tickets.

The K3 surpasses every limit, offering practical solutions and exceptional performance. All this in an elegant product that's been designed to adapt to any environment: from prestigious and refined fashion shops to efficient and highly-functional upscale restaurants and department stores.

In addition to its cutting-edge technologies, featuring an integrated web server, the VeriPrint system, a WiFi module, application notes for Android and the possibility of printing from Apple devices like the iPhone, the iPodTouch and the iPad, the K3 also offers a wide range of other technological solutions.

These include the high-speed troubleshooting of problems associated with routine maintenance, thanks to a system that Custom has developed to provide easy access to the parts in question.

There's even a cable collection system that allows for the cables and connections to be concealed inside the machine itself, thus leaving the support surface in perfect order and free of any encumbrances.

And that's not all. The K3 has even been designed for use within any space or upon any surface, as it can be vertically wall-mounted in order to meet specific installation requirements.

This approach to product development has led to the realization of a number of other important features.

The product's use is further simplified by the presence of luminous capacitive feed and cover-opening buttons, which render the K3 intuitive and easy to use right from the start.

Any required service operations can be easily recognized thanks to the presence of a LED indicator light, while the cover-opening mechanism is automatically triggered as soon as the roll runs out in order to prompt the user to replace it.

The **K3** offers an unforgettable user experience from start to finish.

EMBEDDED WEB SERVER: allows real time programming and monitoring of the fiscal and operating functions of the cash register. The store can count on a safe instrument that can be monitored remotely 24 hours a day.

OPTIONS

- Wi-Fi module
- GPRS/UMTS module
- Verinotch: black mark mobile sensor
- VERIPRINT version
- Version with embedded display

Graphic: 2 loghi (608x862 dots)

Self-installing drivers (certified Windows WHQL): Windows™ 2K, 2K3, XP, 7 (+64bit support), Linux (32/64 bit), OPOS, JavaPOS, MAC OSX

Fonts: international TrueType (Arabic, Chinese, Thai, Russian, etc...)

Barcode: UPC-A, UPC-E, EAN8, EAN13, CODE39, ITF, CODABAR, CODE93, CODE128, CODE32 e Barcode 2D PDF417, QR CODE, DATAMATRIX, AZTEC

Print from Apple devices like iPad, iPhone and iPodtouch

Library and Application Notes for Android: they allow the automatic printing off all special and standard fonts at high quality!

Cables retention system

Paper width reduction
