Configuration Instructions For Part Of Functions

Examples for Custom Prefix and Suffix:

The max number of characters for prefix/suffix are 10 characters. (In order to make sure the prefix and suffix to be output normally, please enable custom prefix or suffix first)

Example 1.1:

Set 'XYZ' as prefix for all codes

Before setting, please search HEX value for all codes and it's '99' (Appendix: Barcode Type ID Table); 'X', 'Y', 'Z' HEX value is '58', '59' and '5A' (Appendix: Visible Character ASCII Table)

Steps: Set 'Custom Prefix'; Set '9', '9', '5', '8', '5', '9', '5', 'A', 'Save'(Appendix: Data and Edit Barcode).

If you need to revise the scanned data before save, please scan 'Cancel The Data of Previous Reading' or 'Cancel The String Data of Previous Reading' to reset.

If you need to give up setting, please scan 'Cancel Current Setting'.

Example 1.2:

Set "R" as prefix for QR

Before setting, please search HEX value for QR code and it's '51'(Appendix: Barcode Type ID Table); 'R' HEX value is '52' (Appendix: Visible Character ASCII Table)

Steps: Set 'Custom Prefix'; Set '5', '1', '5', '2', 'Save'(Appendix: Data and Edit Barcode).

Example 1.3:

Cancel Custom prefix for QR code

Steps: Set 'Custom prefix', Set '5', '1', 'Save'.

Note: If setting prefix for all QR codes, it will cover prefix settings for all QR codes prefix.

In contrast, if you need to cancel all prefix/suffix for all barcodes, please set 'Clear All Custom Prefix' and 'Clear All Custom Suffix'.

Examples for Barcode Length Range Configuration

Please ensure the setting data would not exceed the setting range. Otherwise, the scanner will make error warning sound.

Example 2.1:

Set length range 4-12bits for Code 128

Steps: Set 'Code 128 Minimum (0~50bits)', Set '4', Set 'Save', Set 'Code 128 Maximum (0-50bits)', Set '1', '2', Set 'Save'.

Example 2.2:

Set random length for Code 39

Steps: Set 'Code 39 Minimum(0~50bits)', Set '0', Set 'Save', Set 'Code 39 Maximum(0-50bits)', Set '0', Set 'Save'

Example for USB-KBW Transfer Speed Configuration

If the PC is an old version with lower performance, please choose low transfer speed to ensure the accuracy of data transfer, such as: 50ms

Steps: Set 'Custom Transfer Speed', Set '5', '0', Set 'Save'.

Warning Sound

The scanner will make continuous 4 times error warning sound when data transferring is abnormal. Please check if the cable connection is normal.

Read Skills

To get a good reading performance, the aiming light needs to be aimed at the centre of barcode, and it can be aimed in any directions for convenient reading.

To read barcode correctly, if barcode is small, the scan window of the scanner need to be closed to the barcode, if barcode is big, the scan window of the scanner need to be far away from the barcode.

If the barcode is highly reflective(for example: coated surface), please adjust the scanning angle to read it successfully.

Safety

Please don't use aiming light of the scanner to aim at eyes directly, to avoid causing any hurt or unwell feelings.
